

SAP BTP LAC Clean Core Roadshow

Rodrigo Riveros A.
SAP BTP Enablement & Execution Lead
Latin America & Caribbean

March 2024

SAP BTP is the platform for SAP software landscapes

Keep the
core clean

Accelerate the
move to the cloud

Optimize and automate
business processes

Drive decisions
based on data

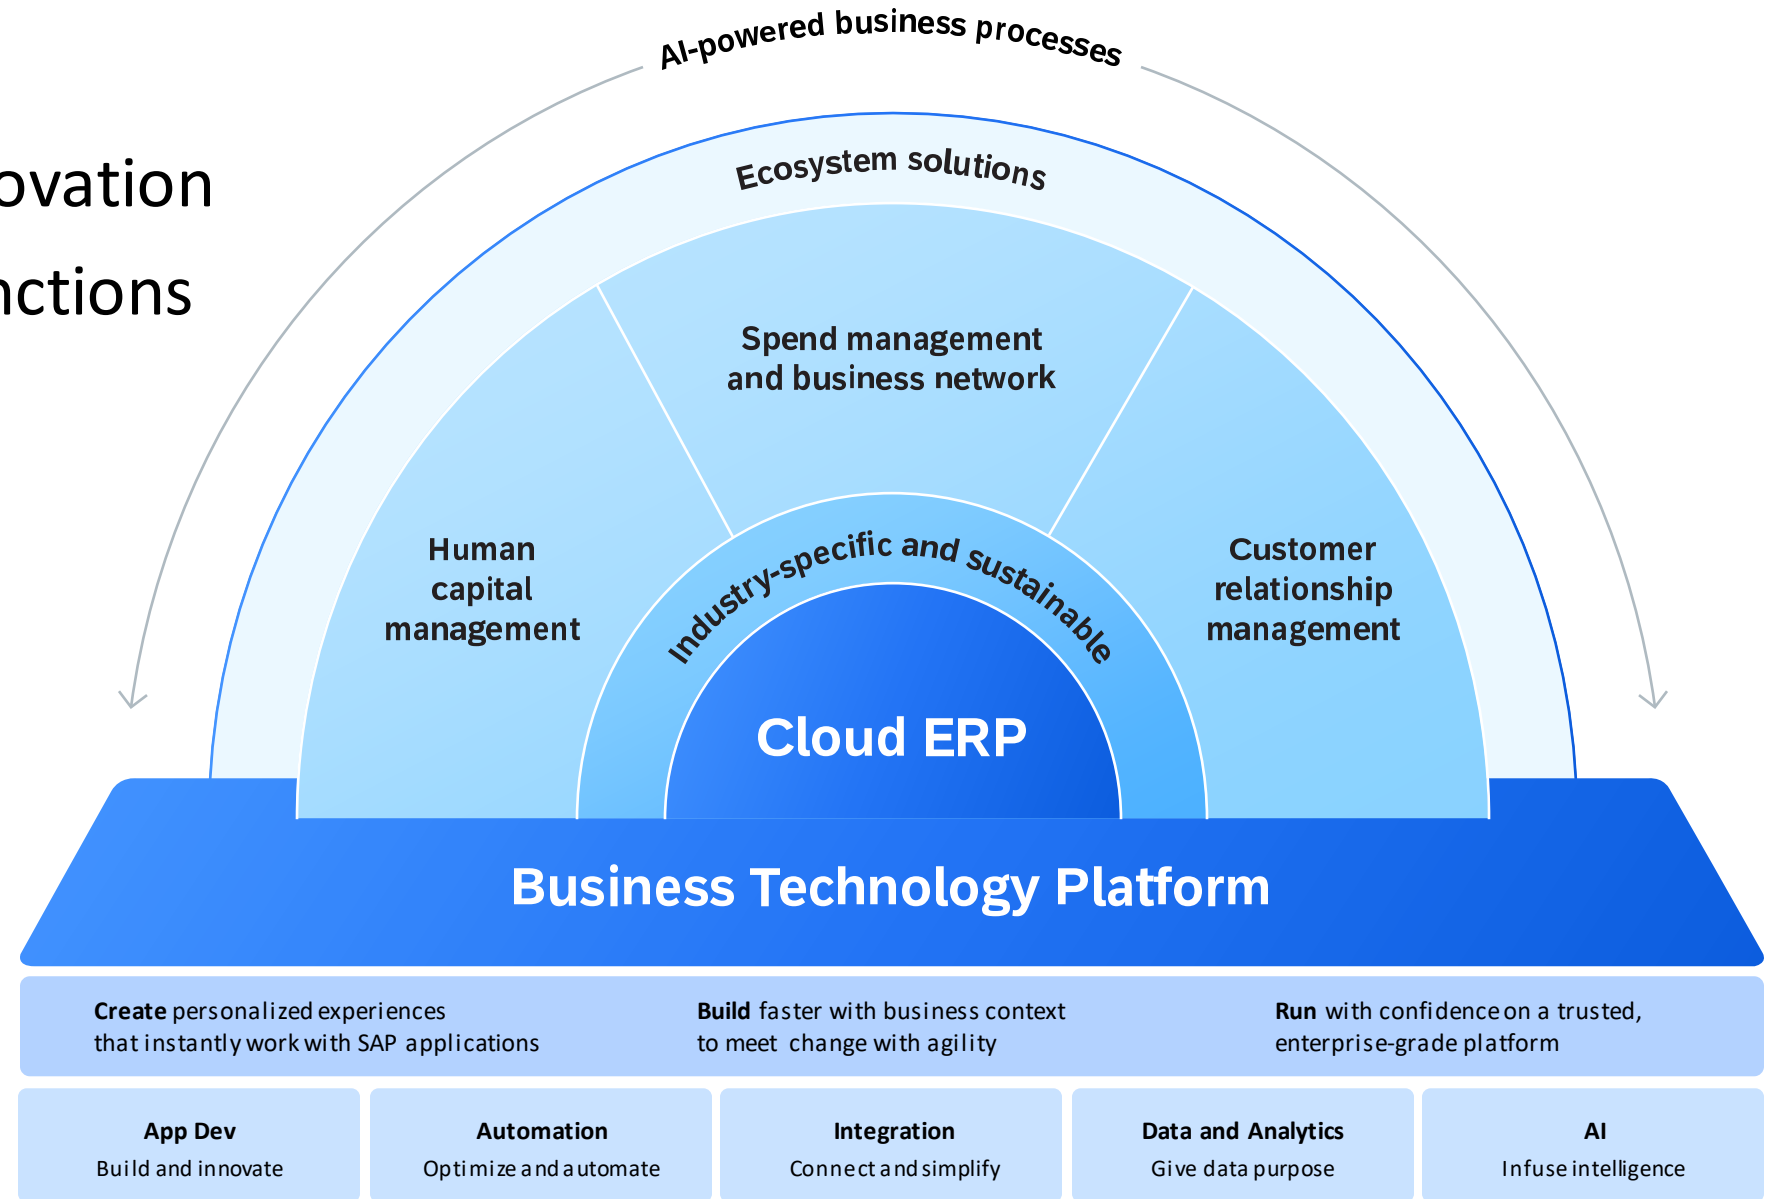

SAP BTP

Unleash digital innovation across business functions

SAP BTP

Unleash digital innovation
across business functions

SAP BTP is your platform to individualize your business processes

App Dev	Automation	Integration	Data and Analytics	AI
→ Visual low-code/no-code experience	→ Workflow management	→ Process integration	→ Analytics and planning	→ Pretrained AI models
→ Pro-code tooling	→ Robotic process automation	→ API-led integration	→ Data management	→ Generative AI and AI workload management
→ Digital experience	→ Process monitoring and analytics	→ Event-driven integration	→ Operational database	→ Business data and context
→ DevOps	→ Automated document processing	→ Hybrid integration	→ Data warehouse and data lake	→ Responsible AI
		→ B2B integration		
		→ Data integration		

ERP Challenges Today

Why do we need clean core?

Process Complexity

Companies must have a **flexible infrastructure** that allows them to quickly **adapt their business models** as needed. This means being able to **rapidly adjust** key applications to meet changing market demands and customer needs.

New Technologies

To succeed in the digital age, organizations need to embrace **new capabilities**. This includes **accelerating innovation**, optimizing and automating processes, and fostering agility in order to **gain a competitive edge**.

Business Change

In today's **fast-paced and ever-changing business environment**, disruption across global supply chains, customer preferences, and the workforce has become a common occurrence. **Businesses must quickly adapt** to these changing requirements in order to remain relevant and thrive.

Businesses' key challenge is staying competitive and relevant

Our customers need to embark on a **digital transformation** to be successful in the future.

Digital transformation

Business agility

Stay competitive and relevant

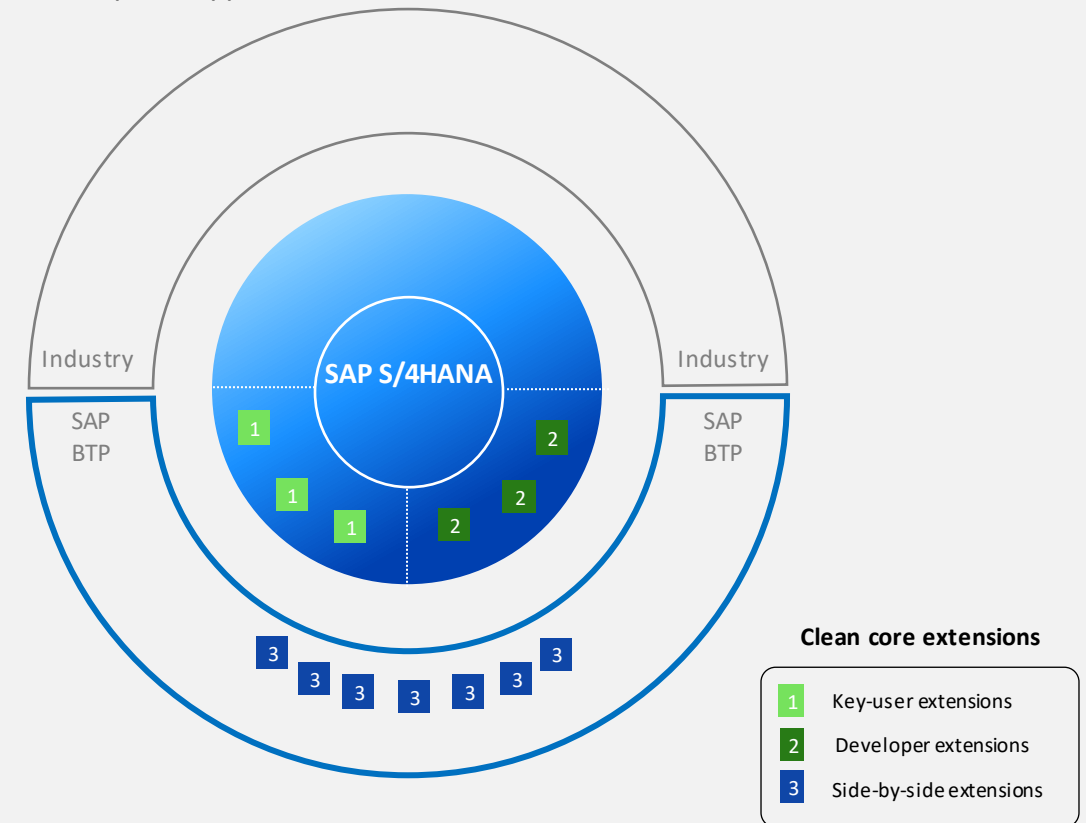

IT flexibility

- Fast Consumption of Innovation
- Faster Upgrades
- E2E Security

Modular innovation

Decoupled from the core and cloud-ready

Modular innovation is the way to achieve this in a future-proof approach.

Customers need a "stable core" for business-critical processes – with a flexible, agile, and innovative way to deliver new functionality in a clean core approach

Clean Core

WHY

Reduce historically grown complexity

Flexible, future ready and competitive ERP

Agile innovation consumption

Efficient operations

WHAT

Holistic strategy

End to end approach

Cloud experience

Mindset and philosophy

HOW

Technical dimensions

Combined perspective on IT and business

Decoupling and standardization

Governance and guidelines

The Clean Core Positioning Challenge

CHALLENGE ACCEPTED

Addressing clean core and the individual dimensions

A **clean core** describes a system or a landscape of systems that is as close to standard as possible, while running cloud-compliant extensions and integrations.

It allows you to **adapt your system and system landscape** to changing business requirements and in order to **adopt new capabilities**.

A **strong governance** is required for each technical dimension of clean core.

Keep **competitiveness** while **reducing complexity**

Main Aspects:

- ✿ State-of-the-art **process governance** e.g. including transparent organizational structures and requirement management
- ✿ **Application architecture** leverages SAP's standard solutions (SAP S/4HANA and beyond)
- ✿ Respective **SAP Best Practices** are implemented, where available and applicable
- ✿ Business **process design follows defined principles** like e.g. focus on differentiating processes
- ✿ **Process management** is established; processes and their variants are documented, as-is-process execution and process performance is measured

Keep **competitiveness** while **reducing complexity**.

1

Business Processes

Decouple extensions from standard.

2

Extensibility

Control data according to **latest standards**.

3

Data

Keep the landscape **reliable and flexible**.

4

Integration

Keep the operations **effective and efficient**.

5

Operations

Decouple extensions from standard

Main Aspects:

- ✿ Extensions should be **avoided** when possible
- ✿ Create **decoupled Extensions**, i.e. in a way that they would work in the cloud (3-Tier Model) by setting up a **strong governance**
- ✿ **Custom extensions** do not break an upgrade and **upgrades** do not break an extension* - separate extensions by leveraging released APIs
- ✿ Leverage the full capabilities of extensibility **on the stack** as well as side-by-side **with SAP BTP**
- ✿ Create **technical debts** only as informed decision

Keep **competitiveness** while **reducing complexity**.

1

Business Processes

Decouple extensions from standard.

2

Extensibility

Control data according to **latest standards**.

3

Data

Keep the landscape **reliable and flexible**.

4

Integration

Keep the operations **effective and efficient**.

5

Operations

Control data according to **latest standards**.

Main Aspects:

- ✿ Modern (configuration, master and transactional) **data quality** requirements are accuracy, completeness, consistency, timeliness, validity and uniqueness
- ✿ **Data volume** needs to be controlled in order to optimize memory and disk consumption i.e. data should not contain outdated, unused or redundant information
- ✿ Personal master data must only be **stored with justifiable purposes**

Keep **competitiveness** while **reducing complexity**.

1

Business Processes

Decouple extensions from standard.

2

Extensibility

Control data according to **latest standards**.

3

Data

Keep the landscape **reliable and flexible**.

4

Integration

Keep the operations **effective and efficient**.

5

Operations

Keep the landscape **reliable and flexible**

Main Aspects:

- ✿ Integrations shall be based on standard API's (OData and SOAP)
- ✿ Side-by-side extensions should leverage **API Integration or SAP S/4HANA Cloud SDK** by utilizing the tight coupling with **SAP Integration Suite**
- ✿ Loosely coupled integrations could be realized in an **Event-Driven Design** based on standard **Events**
- ✿ Avoid **traditional API's** (RFC and IDoc) and their related **classical extension options**
- ✿ Proper monitoring and error resolution capabilities can be realized by utilizing **SAP Application Interface Framework**

Keep **competitiveness** while **reducing complexity**.

1

Business Processes

Decouple extensions from standard.

2

Extensibility

Control data according to **latest standards**.

3

Data

Keep the landscape **reliable and flexible**.

4

Integration

Keep the operations **effective and efficient**.

5

Operations

Keep the operations **effective and efficient**

Main Aspects:

- ✿ The paradigm of keeping the core clean is integrated into the **end-to-end concept for operations**
- ✿ **Release management** should make up the foundation for a clean core
- ✿ **Housekeeping** activities which are in line with SAP best practices should be pursued and the distribution of roles and responsibilities that are agreed with SAP should be followed
- ✿ SAP should be able to perform maintenance for technology within the pre-approved **Contractual maintenance periods (CMP)**

Keep **competitiveness** while **reducing complexity**.

1

Business Processes

Decouple extensions from standard.

2

Extensibility

Control data according to **latest standards**.

3

Data

Keep the landscape **reliable and flexible**.

4

Integration

Keep the operations **effective and efficient**.

5

Operations

SAP BTP Packages & Entitlements

Business Transformation and Clean Core

Clean core is the outcome of a transformation, not the starting point

Option 1

- New implementation
- Combined focus

Technical transformation and business transformation

Strategic overlap with Greenfield SAP S/4HANA implementations

Business transformation and clean core compliance as direct result of the project

Option 2

- Lift and shift or conversion
- Dedicated focus on each phase

Technical transformation

Strategic overlap with Brownfield SAP S/4HANA implementations

Business transformation journey as continuous follow-up to the project

Step 1: IT focus (ideally including governance)

Step 2: Continuous innovation via a clean-core focused approach

SAP has two viable and valid routes for embarking on a holistic transformation journey, depending on an organization's strategy.

SAP S/4HANA Cloud, public edition | Packaging with added Entitlements

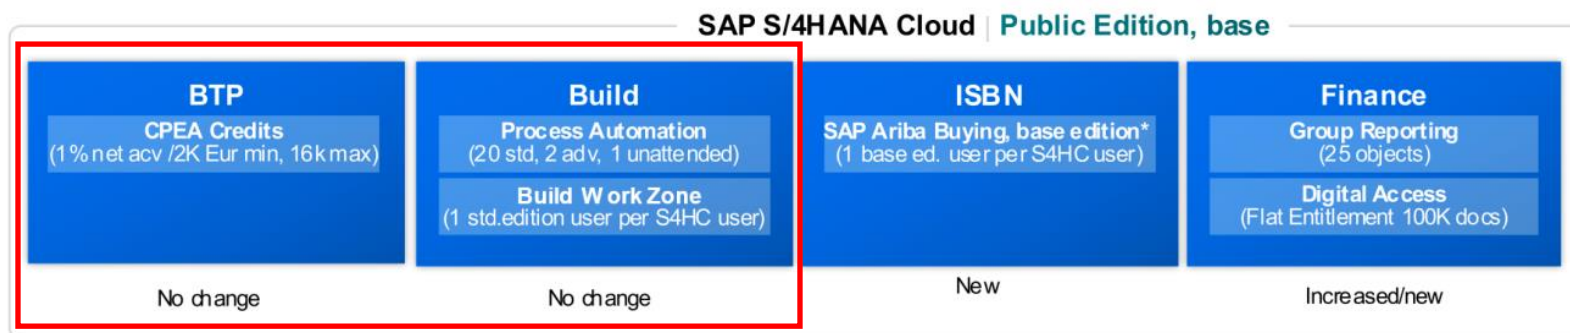

SAP S/4HANA Cloud, public edition packages

Provide compelling S/4HANA Cloud, public edition offerings that reflect the different customer profiles:

S/4HANA Cloud, public edition, base

Mid/lower, mid-market customers at lower price point/emerging economies

(Good)

S/4HANA Cloud, public edition, premium

Mid/upper, mid-market and large enterprises customers seeing the value of enhanced finance capabilities

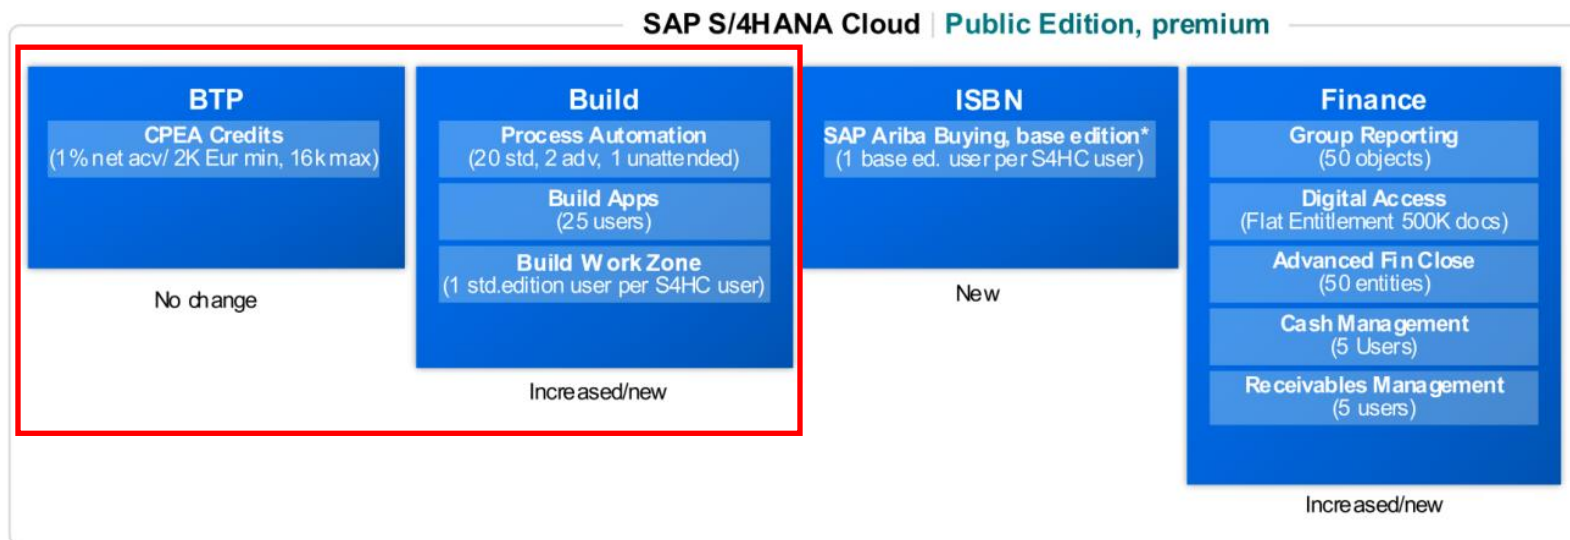

(Better)

Both options continue to include:

- SAP Cloud ALM (application lifecycle management)
- Adobe Forms - 2,000,000 Form Requests per year

* This is an embedded feature included in [Item 4AI](#) for 3SL customers as of 2308

[Scope](#)

BTP CPEA Credits Included in Packages

1% S4HANA Cloud Annual Contract Value

2.000 Credits < BTP CPEA < 16.000 Credits

Max CPEA Amount => EUR 1.600.000 ACV S4HANA Contract

Let's see some BTP Deal simulations --> <http://discovery-center.cloud.sap>

Simulation Case 1: Development (Extension) Suite

Application Development

Build and innovate

Key capabilities from proven technologies and tools in SAP BTP

Simplified and guided development

Generative AI for development

More secure and trusted integration

Smooth extensibility of SAP Solutions

Interoperability

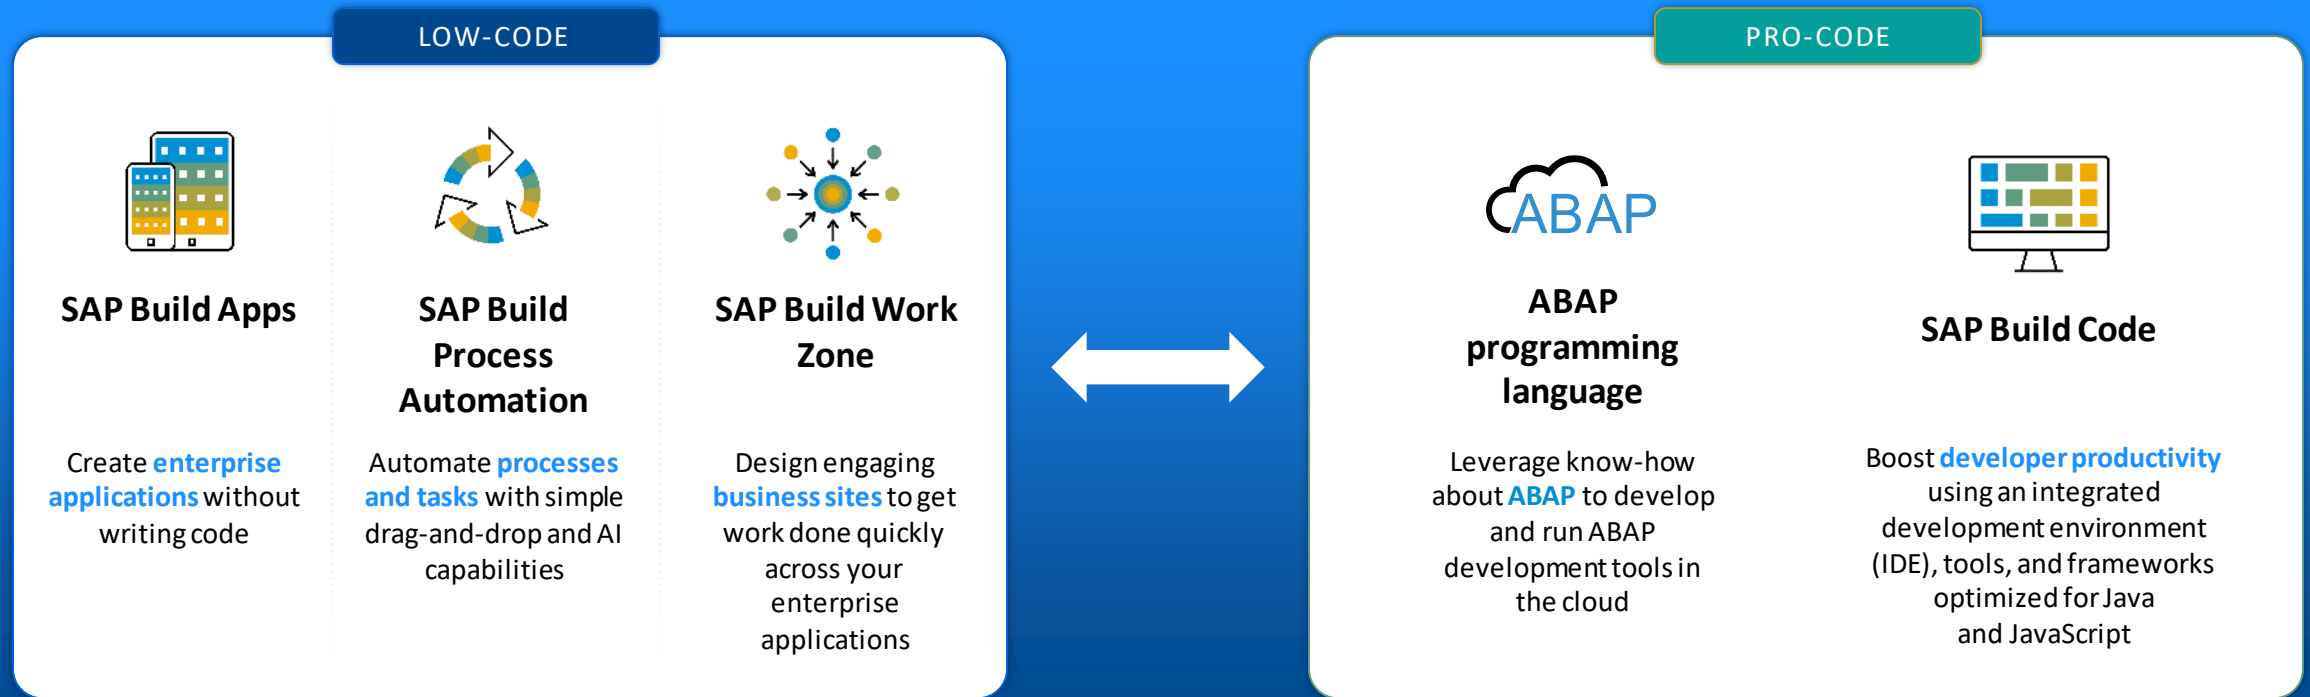

Fusion development

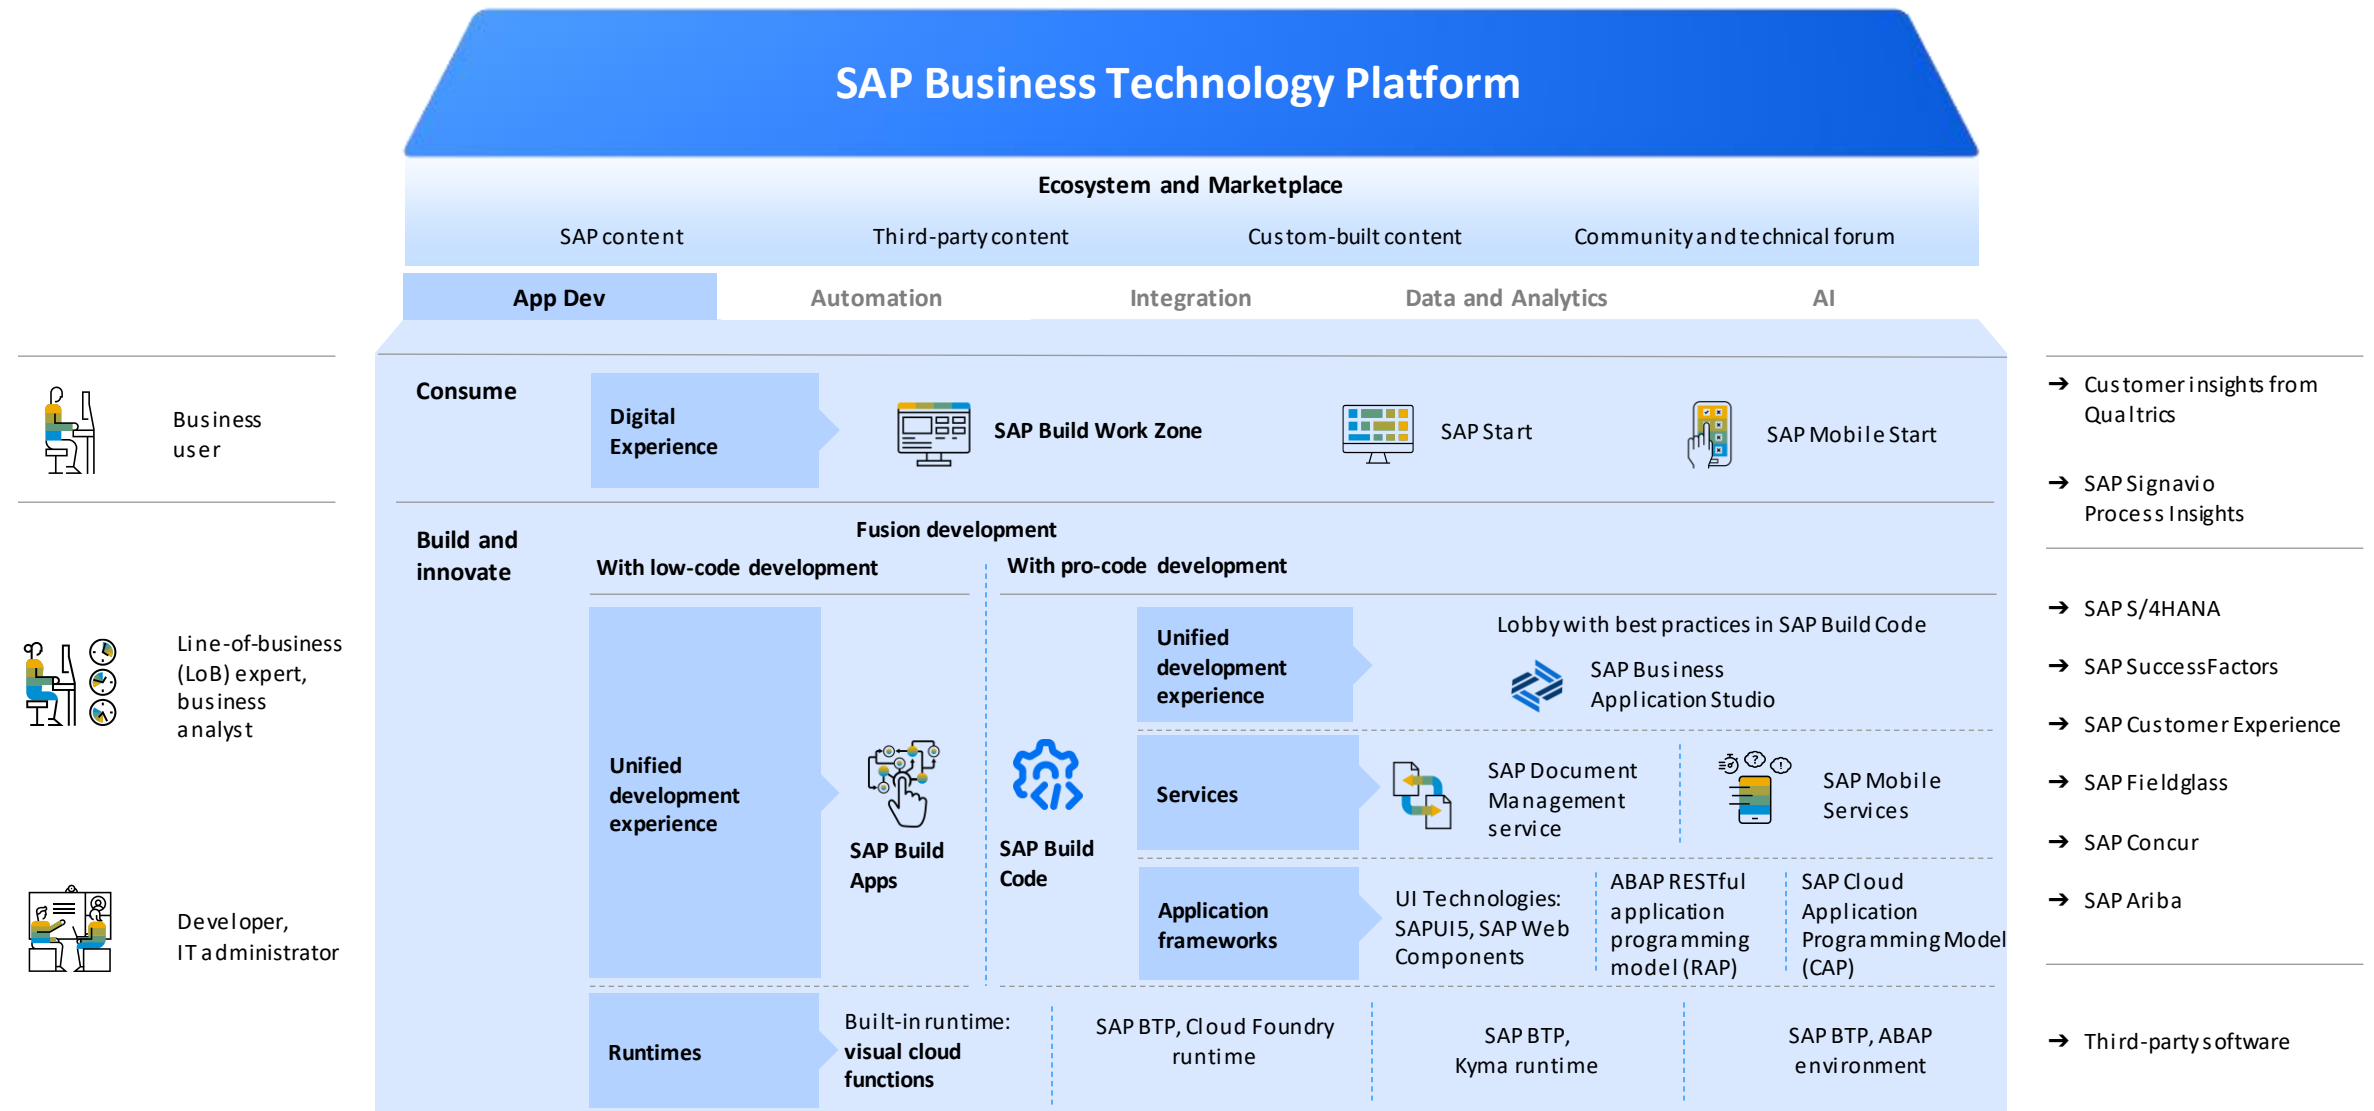

For business and professional developers

With low-code and pro-code tools

Application Development with SAP Business Technology Platform

Automation

Optimize and automate

SAP Build Process Automation

A simpler and faster way to automate business processes

Automate visually

Simplify automation with drag-and-drop and AI capabilities.

Integrate smoothly

Automate faster using built-in workflows, bots, and connectors for SAP and third-party systems.

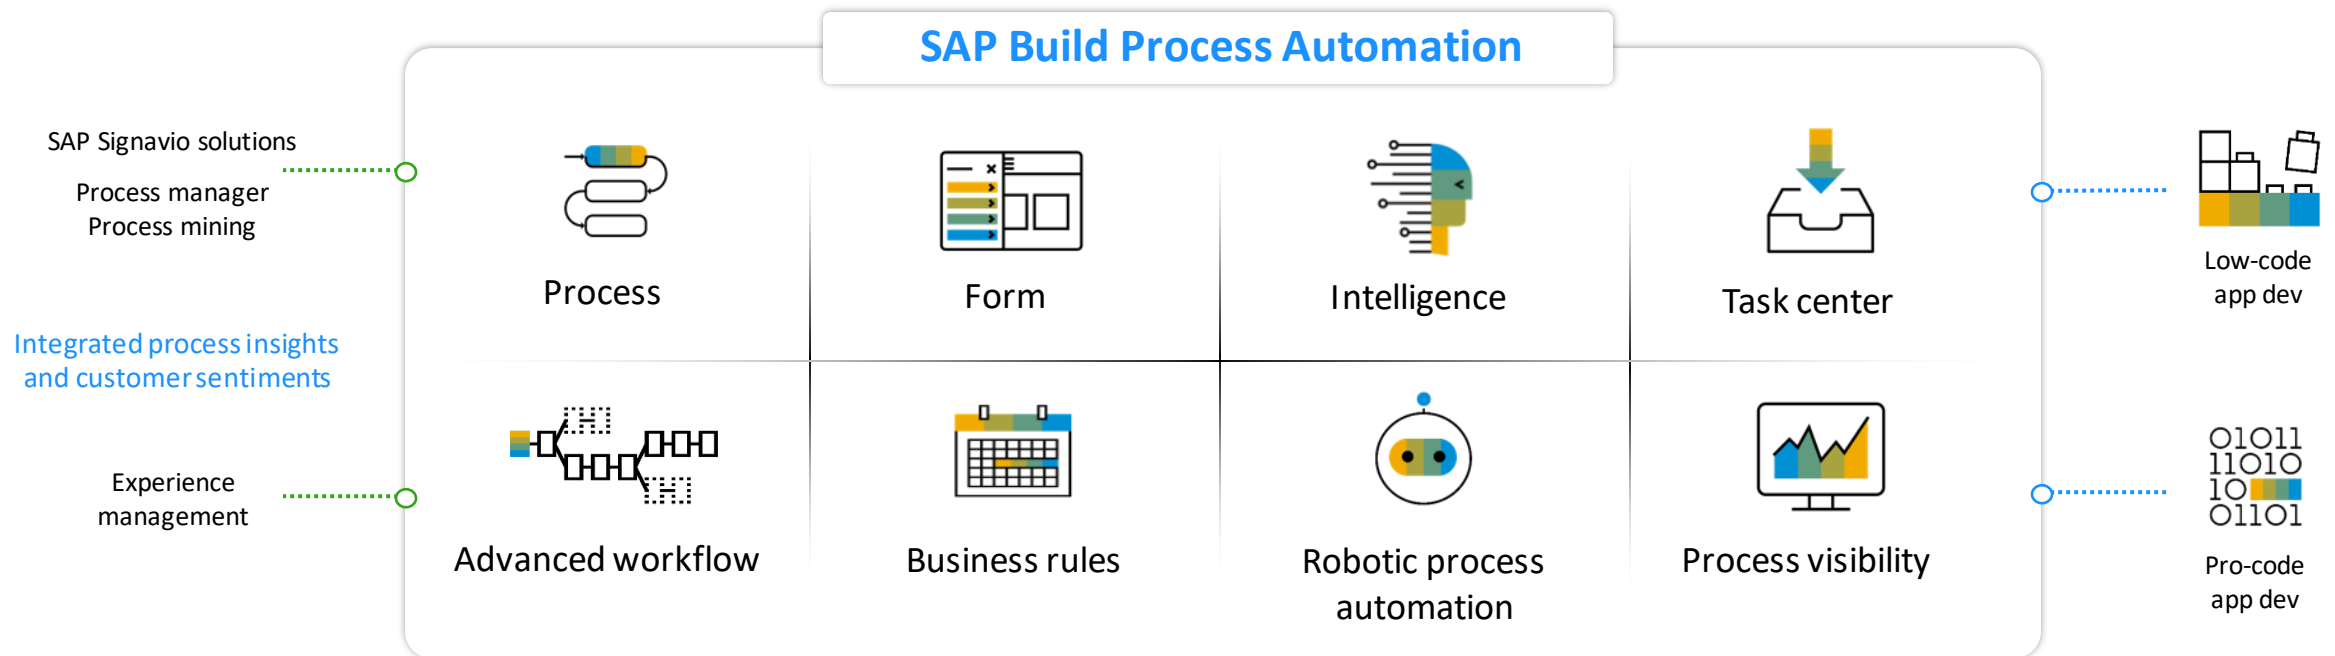

Collaborate more securely

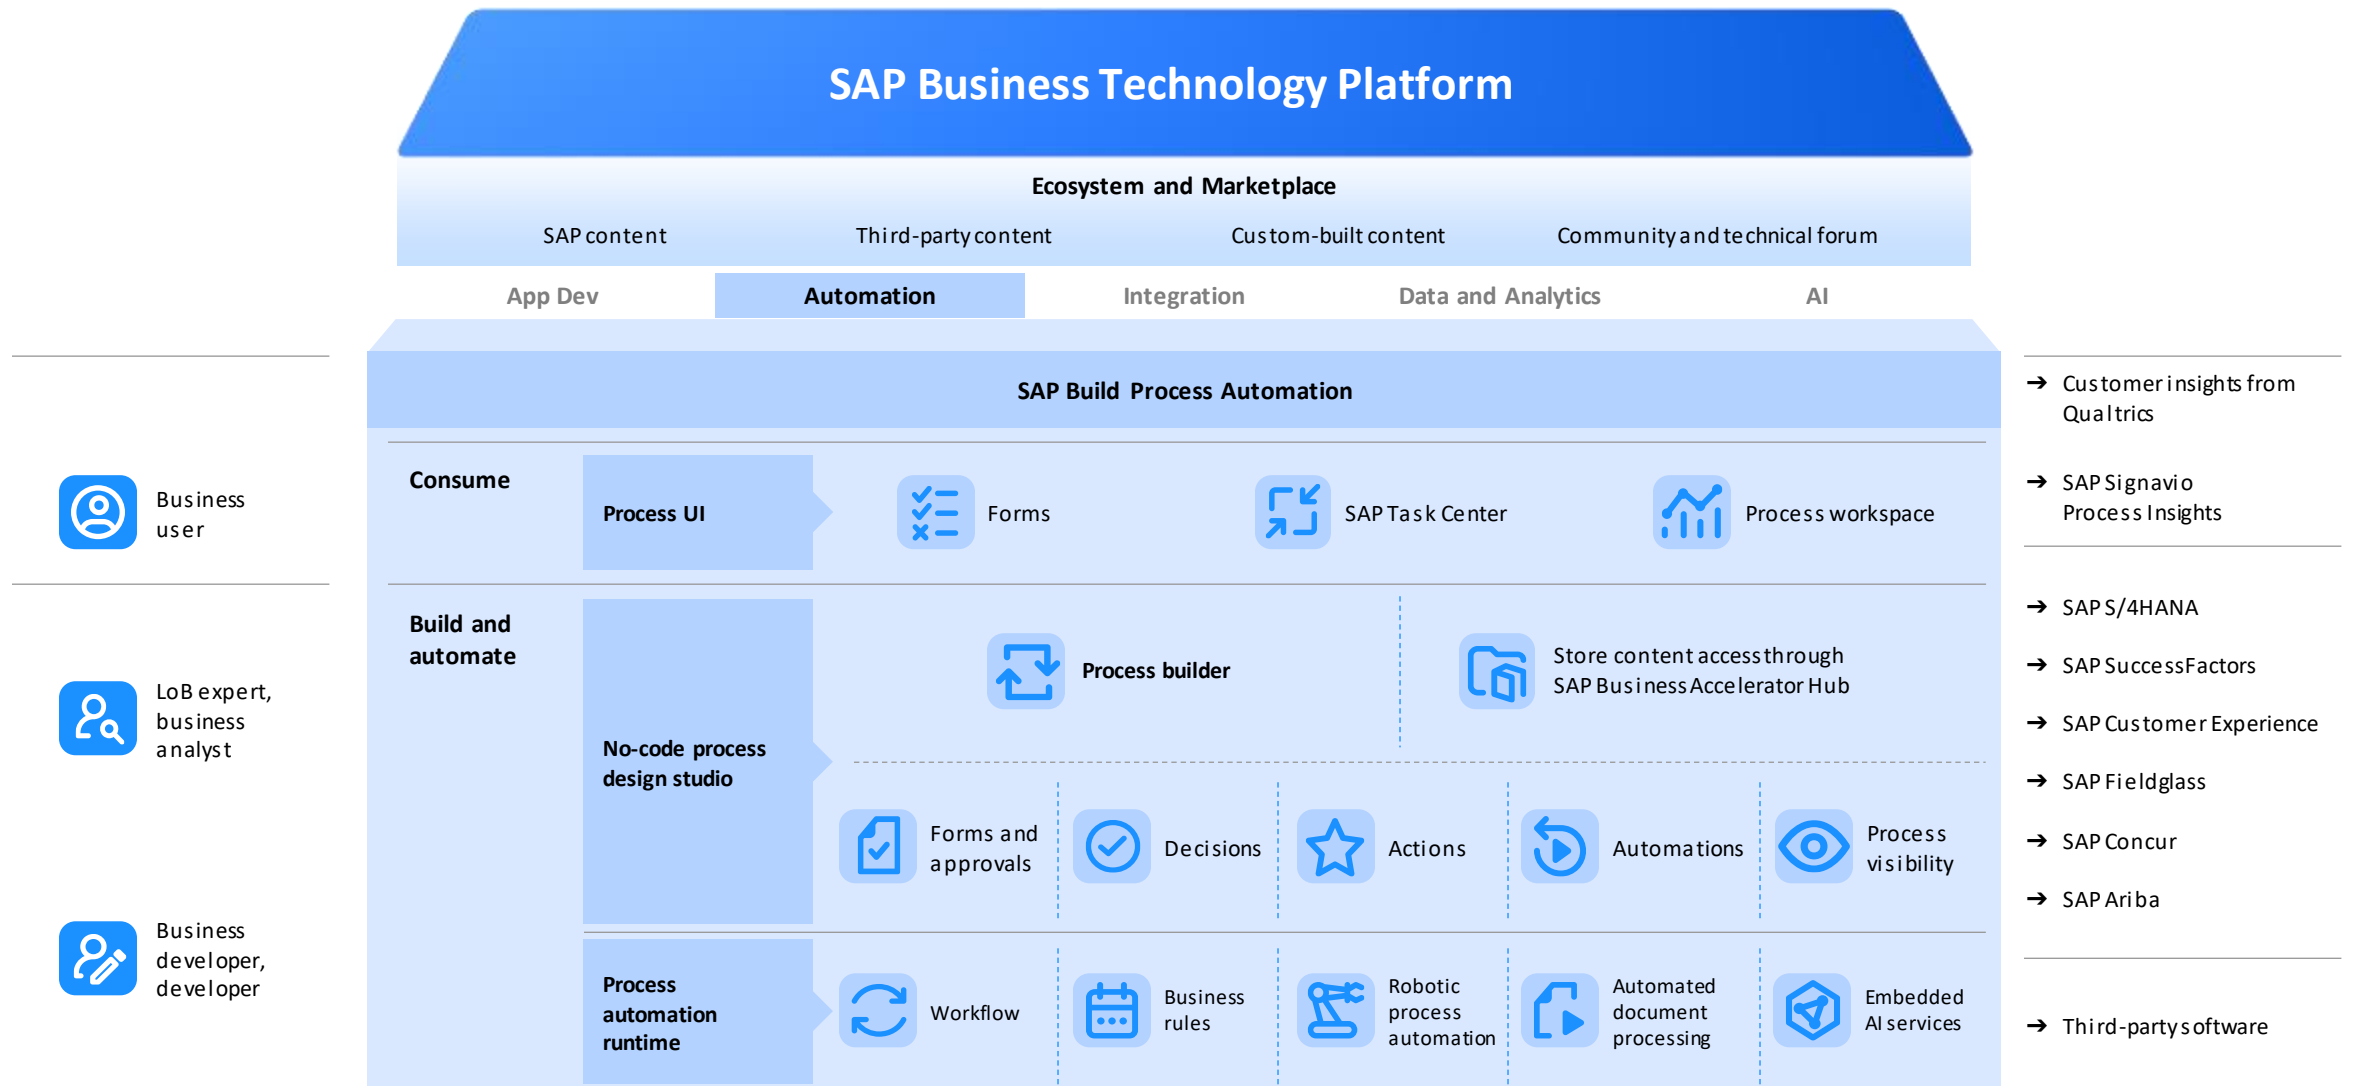

Enable fusion team development in a more secure and agile fashion.

SAP Build Process Automation

Hundreds of built-in automations | API complexity is hidden

Automation – SAP Build Process Automation

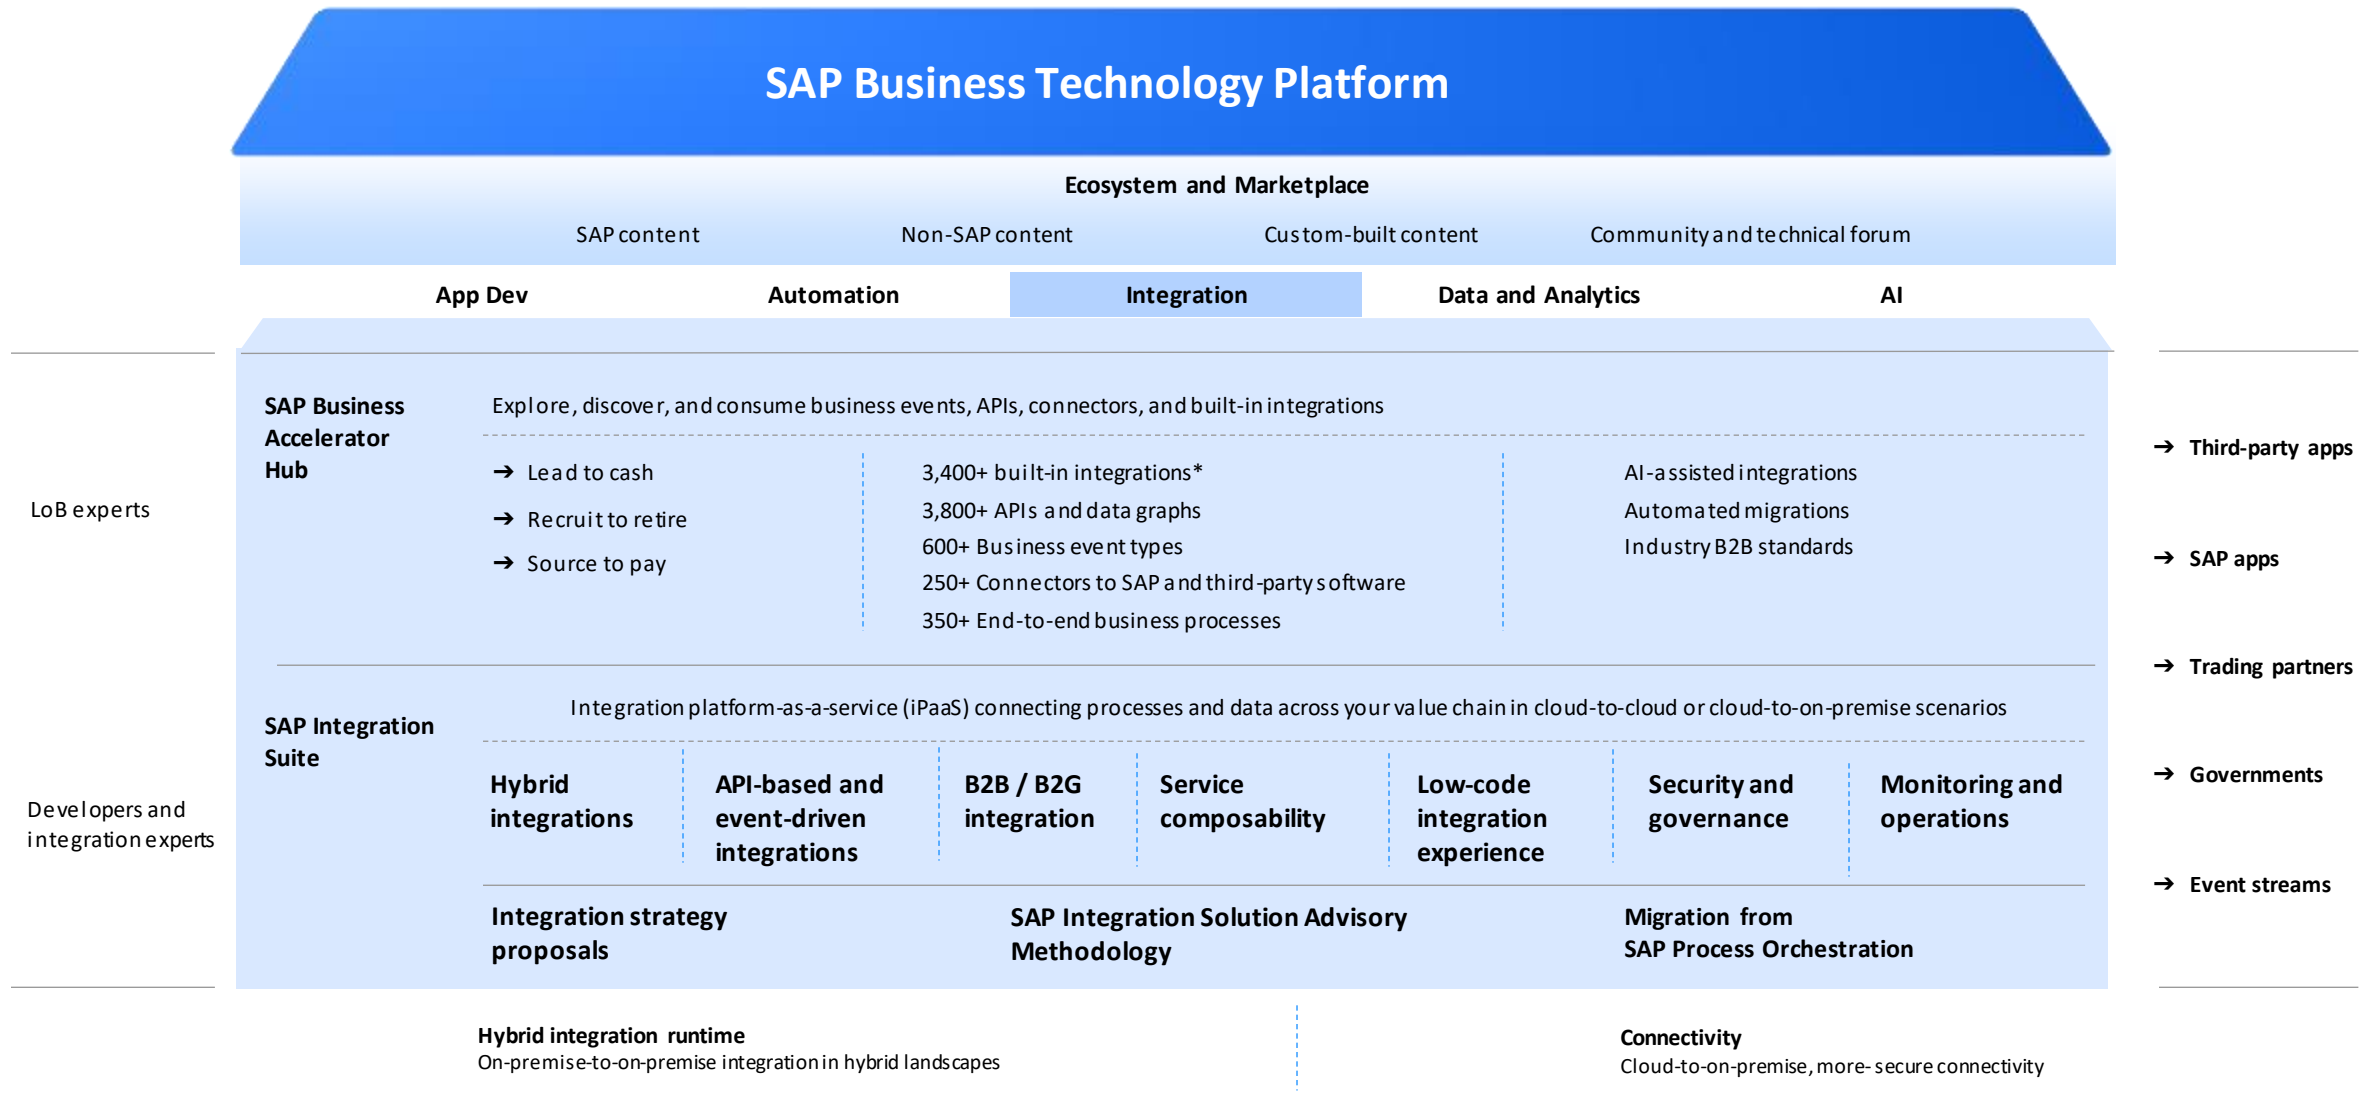

Integration

Integrate everything to innovate

Integration with SAP Business Technology Platform

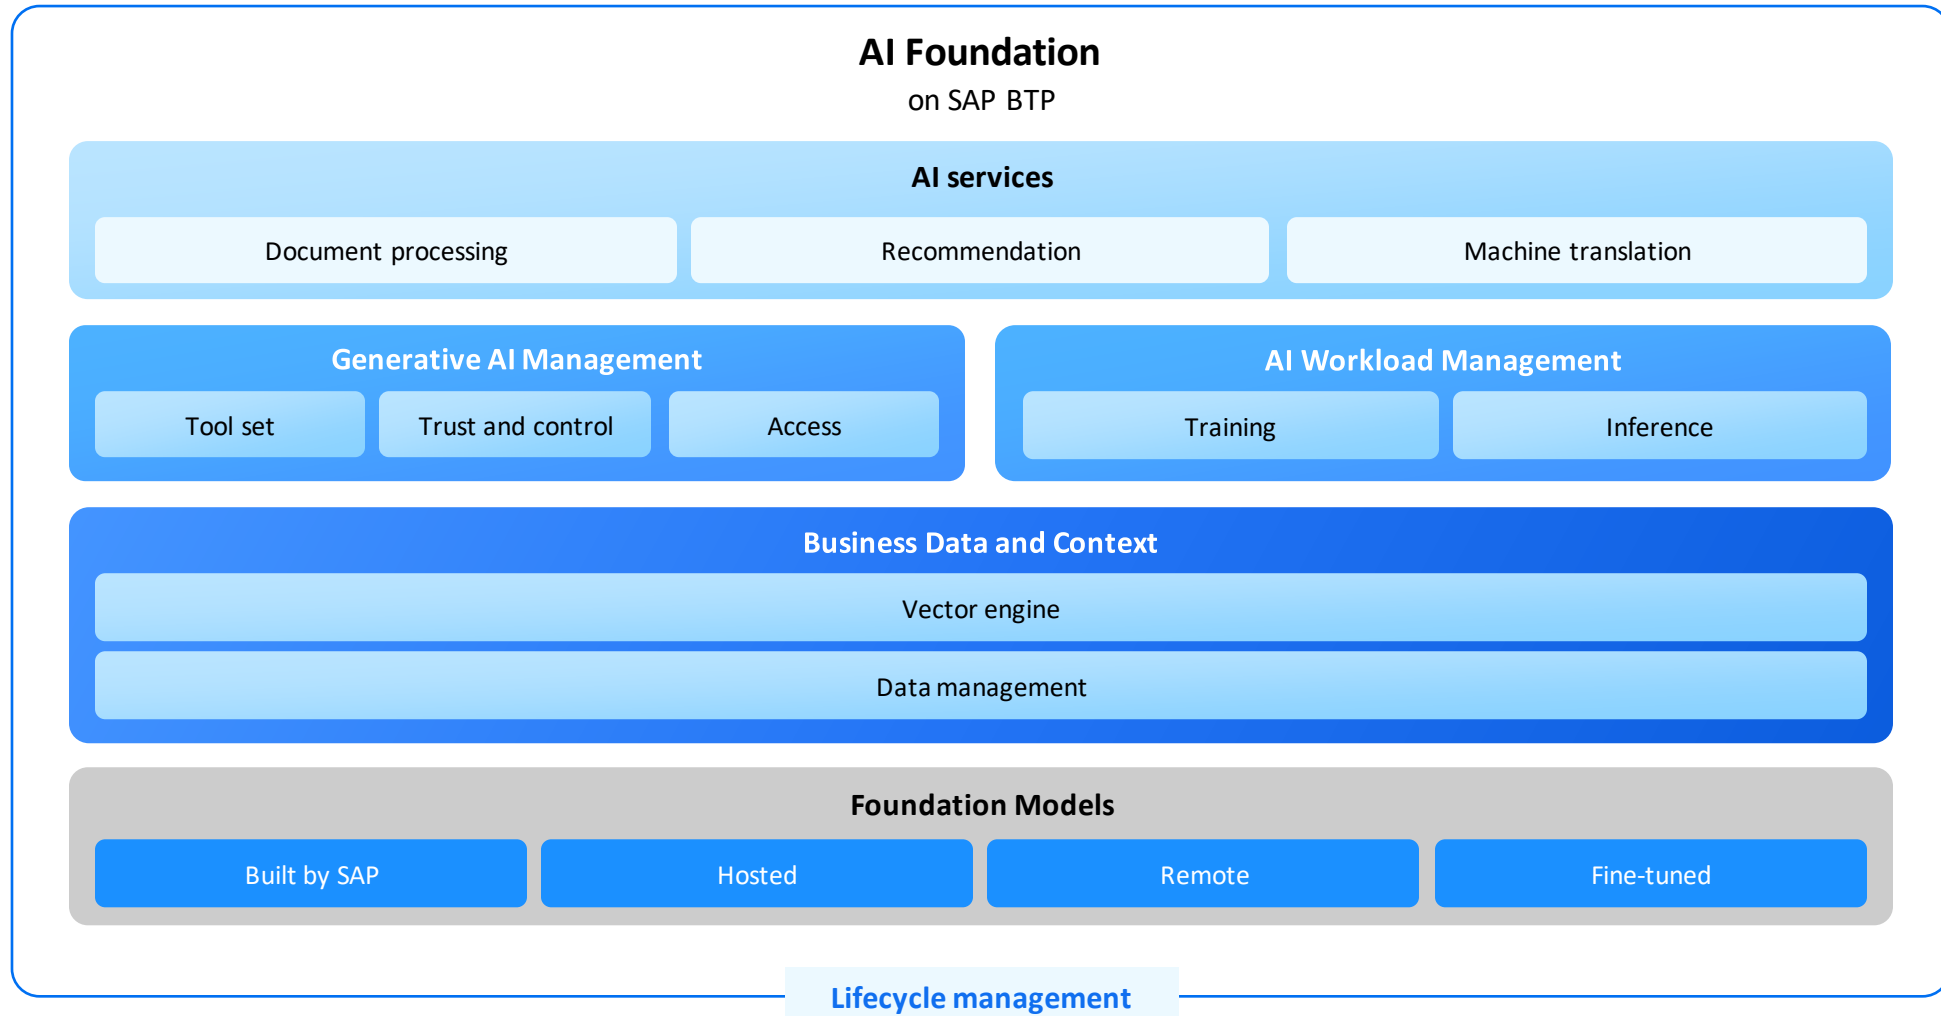

Artificial Intelligence (AI)

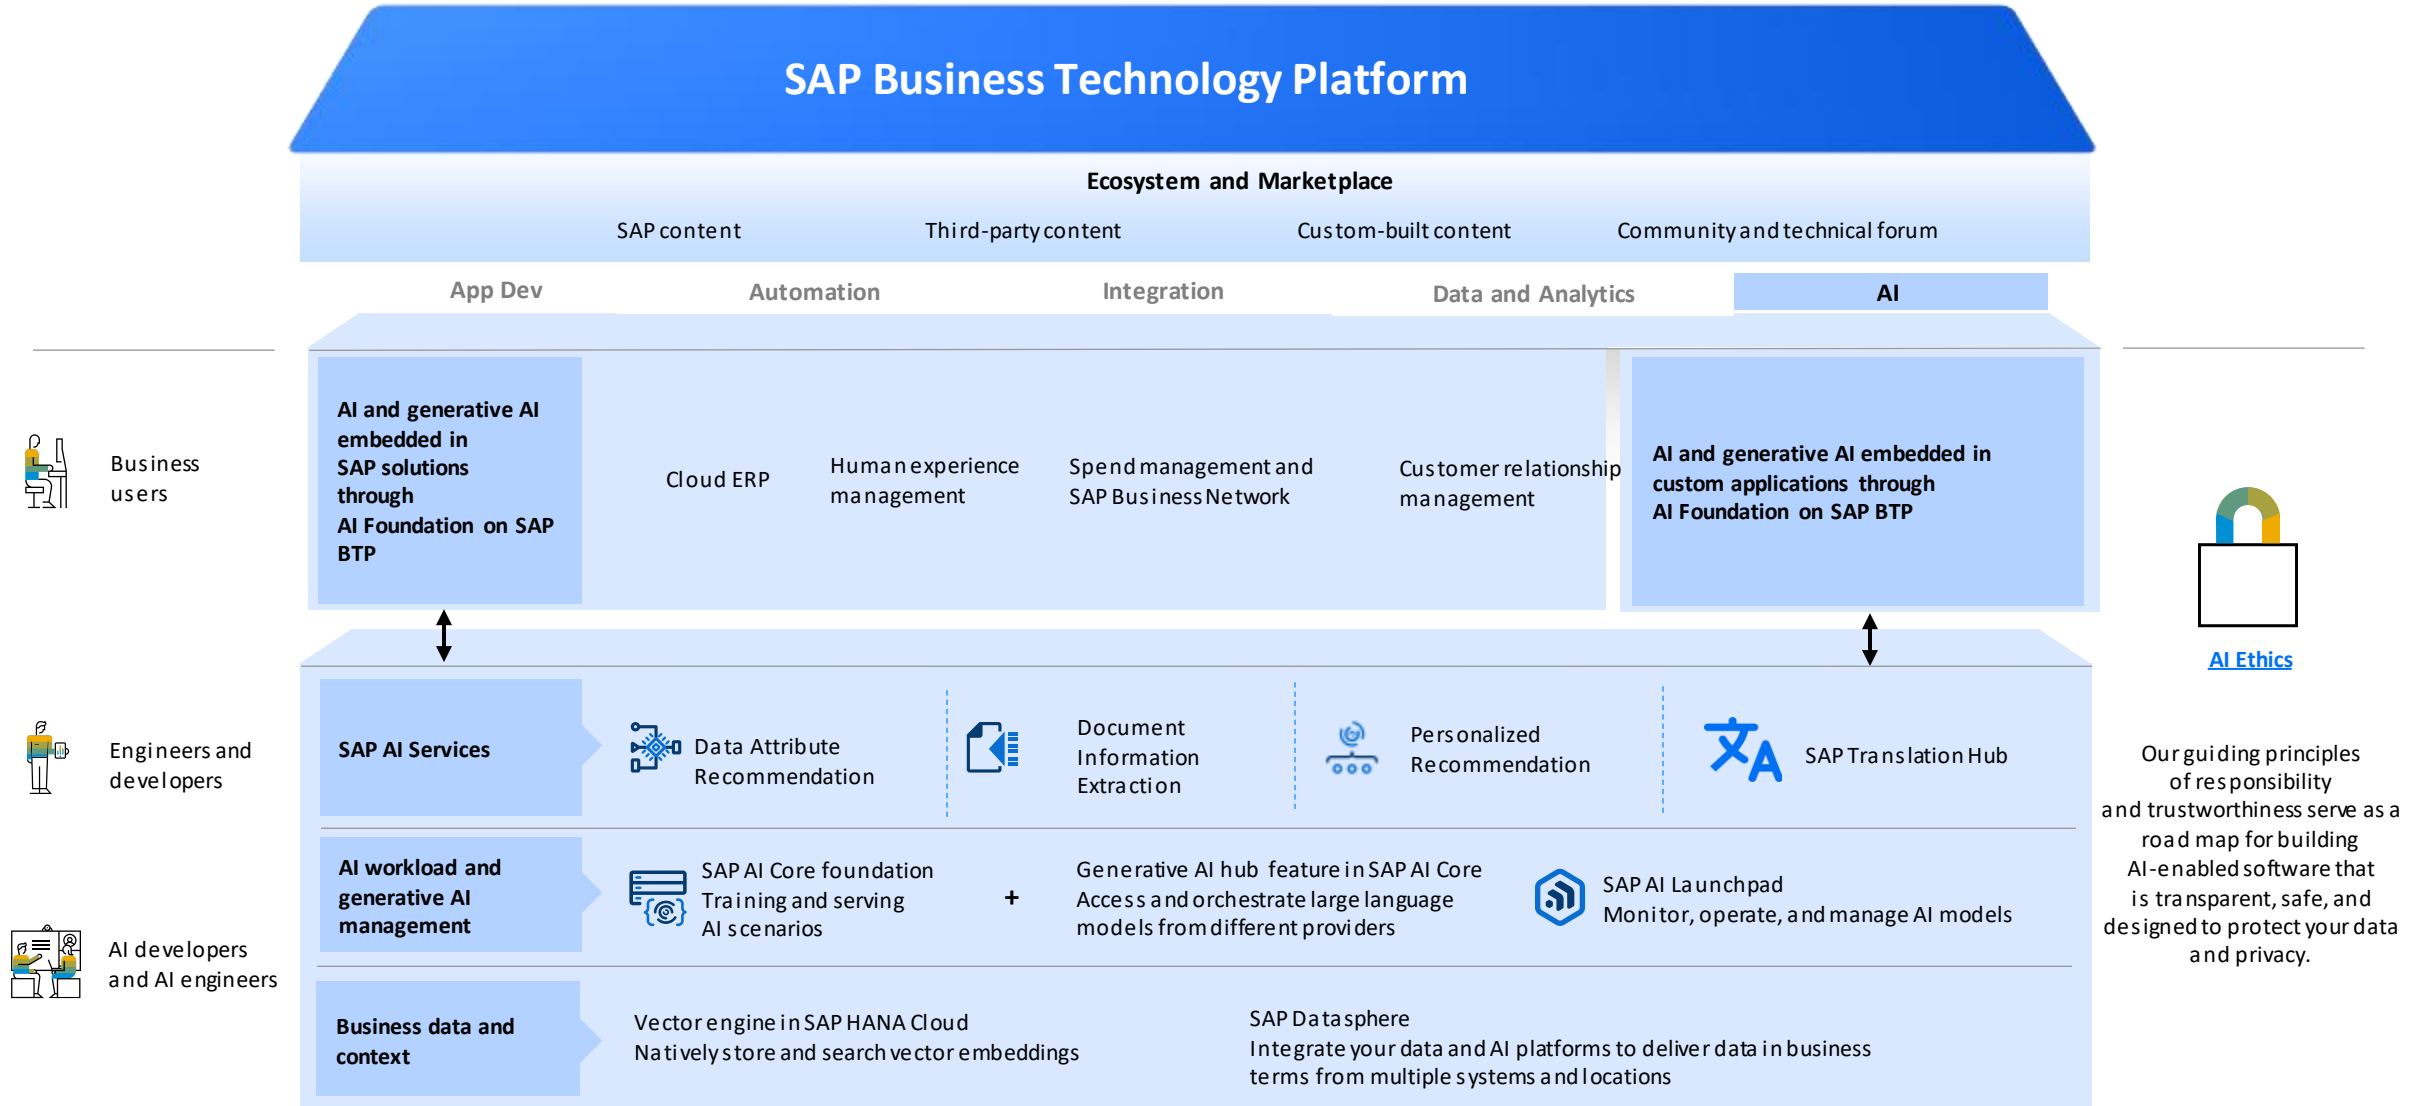

Infuse AI into your SAP applications and extensions

A comprehensive set of services for AI developers on SAP BTP

Virtual events & boot camps

Where do I go next to get enabled on SAP BTP?

Virtual event calendar

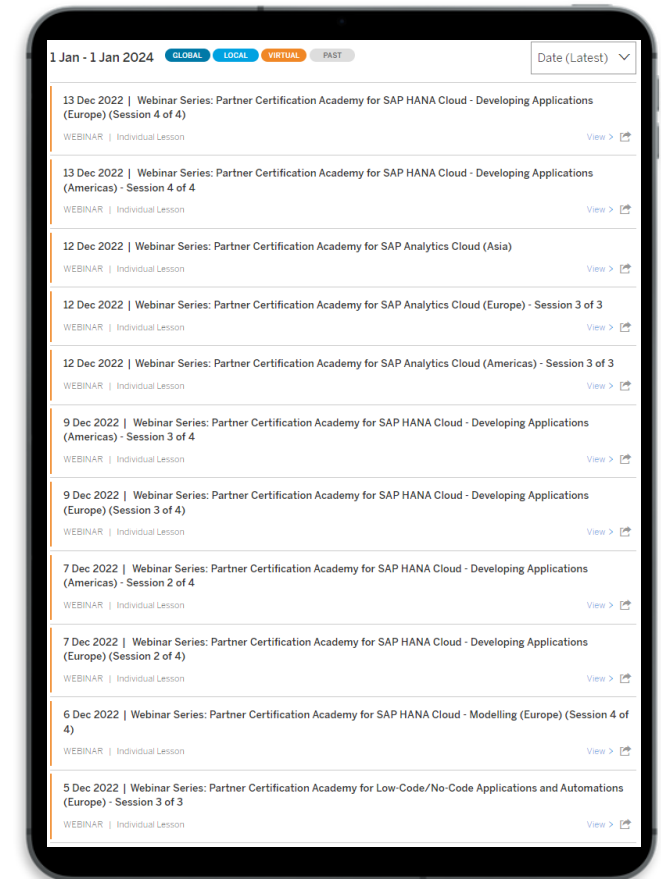

- Check out the complete menu of the relevant [virtual events and boot camps](#) in the SAP Partner Portal calendar.

Highlighted past boot camps

- Exploring the potential of GPT in SAP Ecosystem ([blog](#) | [replay](#))
- Building Intelligent and Sustainability Scenarios with AI & Planning on SAP BTP ([replay](#) | [openSAP course](#))
- SAP Business Technology Platform Sales Bootcamp ([blog](#))
- SAP BTP Digital Experience Services - SAP Launchpad Service & SAP Work Zone Hands-On ([replay](#))
- SAP Business Technology Platform Integration Black Belt Program ([replay](#))
- Cloud Native Architecture and SAP BTP, ABAP Environment ([replay](#))
- Extend Business Solutions building serverless functions / microservices with SAP BTP – Kyma (CX and S/4) ([replay](#))

New/Recent openSAP courses:

- [SAP BTP and Amazon Web Services](#)
- [Modernize Integration with SAP Integration Suite](#)
- [Understanding and Implementing the SAP Mobile Experience](#)
- [Building AI and Sustainability Solutions on SAP BTP](#)
- [Integration for the Intelligent, Sustainable Enterprise](#)
- [SAP Master Data Integration in the Intelligent Enterprise](#)

Partner Certification Academies for SAP Business Technology Platform

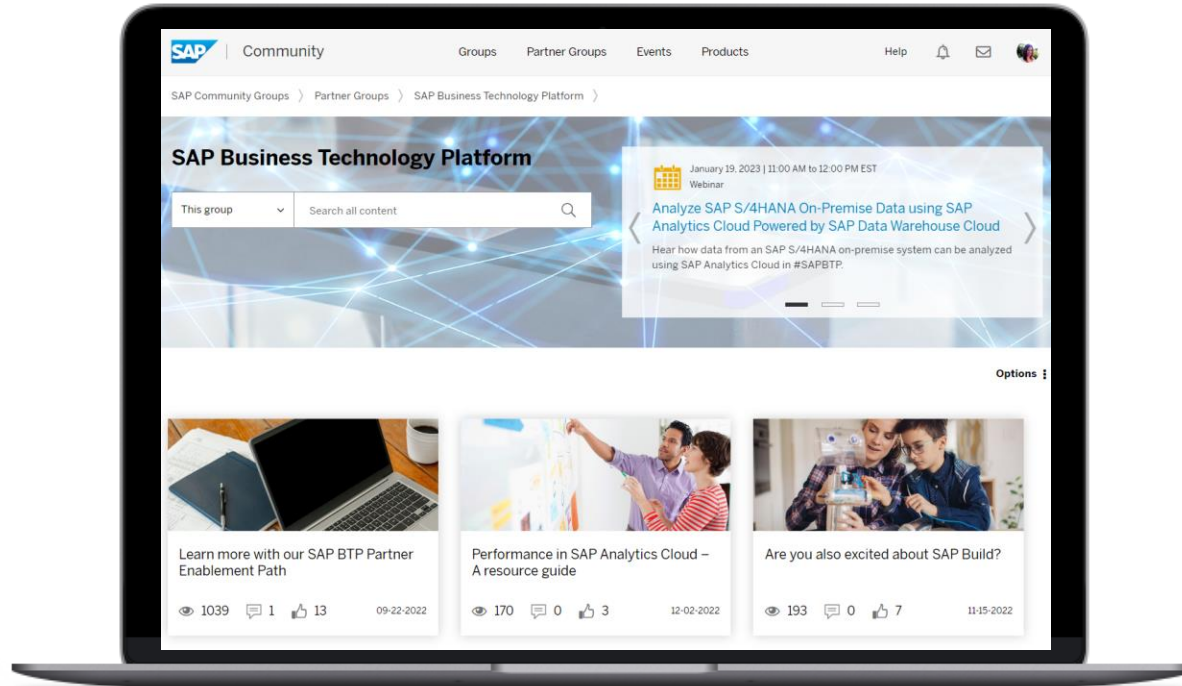

Learn about - and get certified for - SAP Business Technology Platform faster than ever before.

Work directly with SAP experts who will guide you through the content of selected SAP BTP learning journeys and help you prepare to pass the associated certification exams.

We offer [Partner Certification Academies](#) across the SAP BTP portfolio and the latest schedule can always be found [here](#).

The SAP BTP Partner Community

We invite you to visit our new
[SAP BTP Partner Community](#)

Become a member

[Join Group Hub](#) to receive notifications on latest posts and stay in the know. [Learn how to join.](#)

Ask questions

Initiate a [new discussion](#) on any topic or comment to the blog posts—our experts are monitoring the community 24X7

Browse blogs and articles

Browse through the variety of [unique blog posts](#) or [technical articles](#).

Start your BTP enablement journey

The [SAP BTP Partner Enablement Path](#) takes you through the BTP offerings from digital learning , webinars and boot camps to coaching offerings.

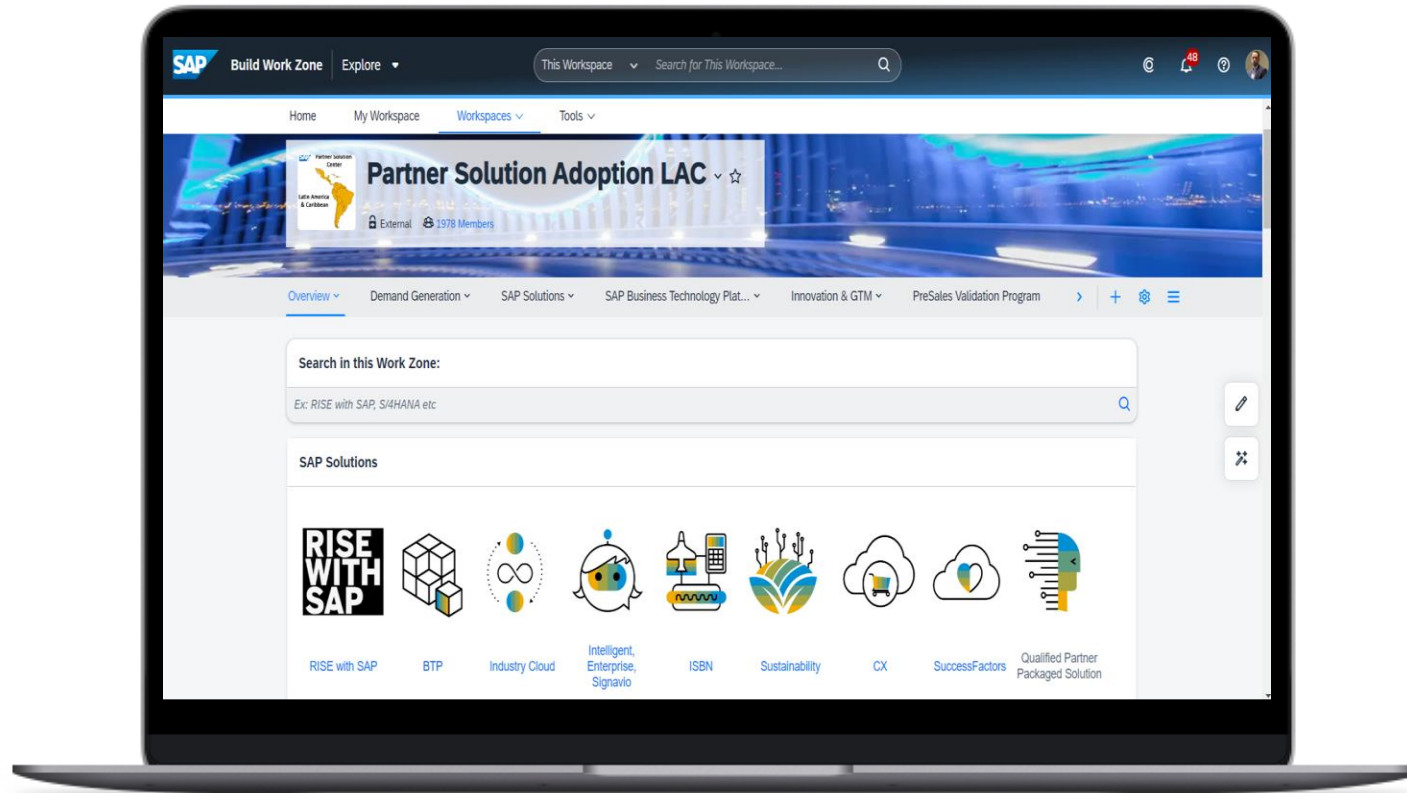

Join SAP BTP Partner Community Calls

Every quarter SAP Experts come prepared to the [community calls](#) to have an open discussion and answer questions from our partners

Share your knowledge

Coaching services & Partner Co-innovation

How can I request support for my specific SAP BTP use case?

Coaching is a unique opportunity to engage 1:1 with SAP experts on a concrete use case that you are looking to realize on SAP BTP

End-to-end partner co-innovation support

Partner Co-innovation Desk

- Review readiness and suggest enablement
- Consult on use case GTM path
- Assign matching coaching service
- Follow up and accompany along innovation journey

SAP BTP use case coaching support

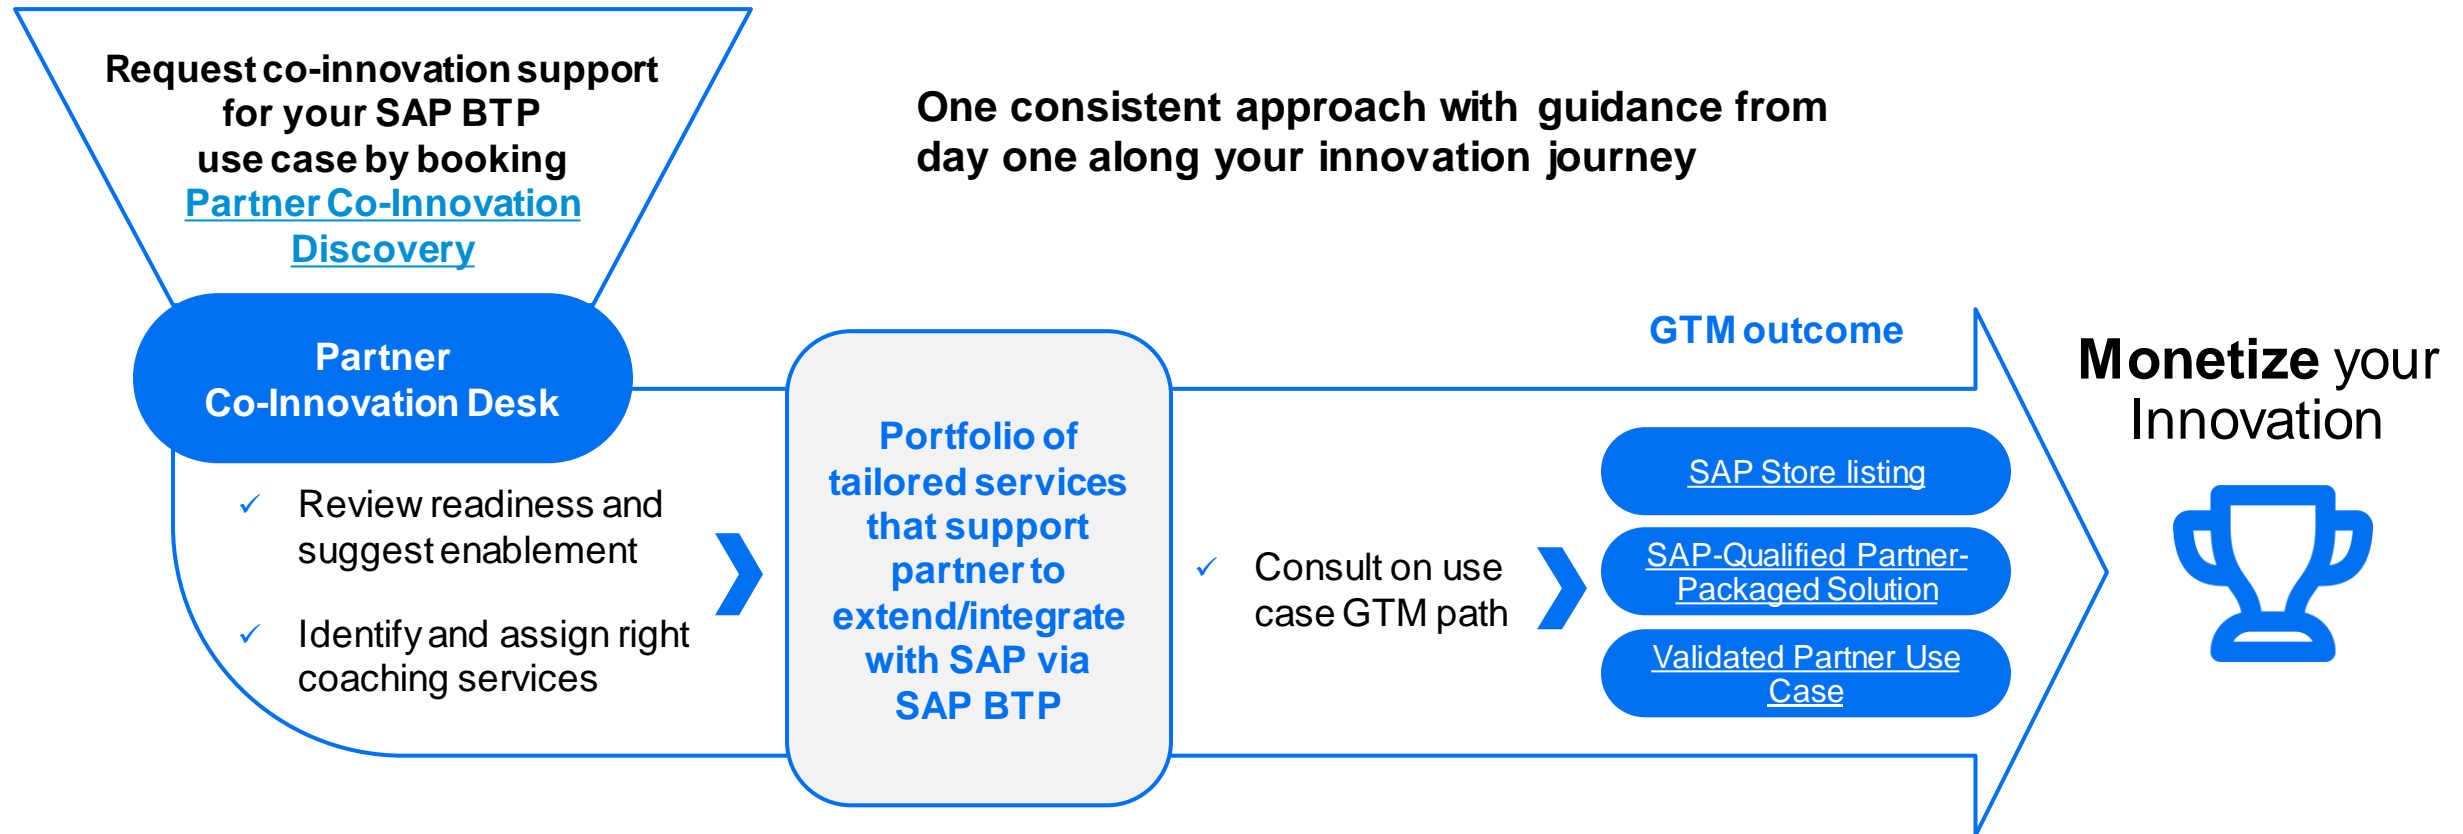

Coaching Portfolio

- Request individual coaching services
